[Hot Tub Hire Information / Agreement](#)

[Anyone using one of our spas should read this information and the operating and safety instructions.](#)

1. Your spa will be filled with cold water and will take at least 24 hours to reach the recommended temperature of approximately 37° C. If you have a combination boiler you could have it filled with hot water so it is ready to use when filled.
2. To change the temperature adjust using the controls on the pump unit.
3. When using the spa, remove lid and store carefully. Enter the water with care making sure it is not too hot (test first). Do not jump in.
4. When not using the spa always replace the lid to retain heat.
5. The spa will maintain the set temperature by itself, although during periods of heavy use or when the lid is removed for an extended period there will be a fall in temperature. Staying out of the spa and replacing the lid will allow the water temperature to rise to the desired level.
6. Over filling the spa will cause it to overflow. Each person entering the spa will raise the water level by 5 - 7 cm. When the bubbles/jets are activated the water level again rises by a similar amount.
7. Always leave the spa plugged in and switched on in order for the filtration /heating systems to work.
8. Please do not smoke or drink alcoholic beverages when using the spa.
9. **Please do not use any electrical items within five feet of the spa.**
10. Children must be over ten years of age and accompanied by an adult at all times when using the spa.
11. At 37.5 °C or above you should not spend more than 15 minutes in the spa.

12. If you are pregnant or have a medical condition please check with your doctor before using the spa.
13. Please lock the cover when the spa is not in use.
14. **It is advised that everyone using the spa showers before use**, and no foreign bodies (such as grass) are introduced to the water. Your spa will perform better if kept clean and therefore more enjoyable to use.
15. **Remove the filters as often as needed** and power wash with hose set on maximum pressure. Failure to do this may result in temperature decline for which Arctic Spas and Leisure (Lymington) Hot Tub Hire will not take responsibility.
16. Our spas are designed for 4-6 persons. Overloading the spa can cause damage for which you will be liable.
17. Chemicals will need to be added. We will go through this with you verbally upon delivery and will leave you with information regarding application, handling, storage etc. If you have any questions just ask.
18. Arctic Spas and Leisure (Lymington) will not be responsible for any water damage that occurs from spas set up indoors.
19. You are liable for this hot tub whilst in your custody for any loss or damage. We recommend that you contact your household insurance company to inform them of this hire and ask them to provide cover.

Any damage incurred due to misuse or not following the above recommendations must be paid in full. Undersigned hirer understands the above information and acknowledge that the use of the spa is at the hirer's risk.

Undersigned hirer agrees to release our company from any and all liabilities incurred with the use of the spa.

I have accepted the spa as being in perfect condition unless detailed below.

Date _____ Signature of hirer _____

Collection date _____ Signature of witness _____

Payment due £ _____

We do hope you enjoy your spa and recommend us to your friends. If you have any questions during the hire period contact us straight away.
